

# Managed PhishLine

## Real-World Phishing Simulation and Security Awareness Training

Phishing and other potentially devastating attacks can slip through security gateways. These evolving and sophisticated attack techniques put your business at risk for data loss, and financial fraud. With Managed PhishLine, you help safeguard your customers through interactive phishing simulation and security awareness training, and our team takes care of the campaign management and reporting.

### Why Barracuda PhishLine

**Security Awareness Training** — PhishLine's real-world multivariable testing creates mock-phishing campaigns that teach your customers' users to recognize the threat. The interactive campaigns use a mix of links, Smart Attachments, videos, graphics, and training materials to create impactful educational experiences.

**Robust Reporting** — Get regular insight into who's clicking on what, which will help you identify the levels of risk within your customers' organizations.

### What's included

An experienced team of technical professionals will provide:

- Monthly campaigns created and managed by a dedicated consultant
- A mix of phishing simulation emails and interactive materials sent directly to the training participant
- Regular reports, branded that you can share with each of your participating customers
- Access to an exclusive MSP phone support line

### Why Managed PhishLine

- Easily provide enhanced security awareness training to your customers without added work for your technicians
- Maximize the value of the service while saving time
- Deliver regular reports that highlight the value and effectiveness of security awareness training

### What to expect

In this service, our team will:

- Create and execute monthly phishing or email security awareness campaigns
- Provide regular activity reports

### Once you have purchased Managed PhishLine and received your welcome email, simply:

- Send our Managed PhishLine team a list of the end-user email addresses you would like to receive the monthly campaigns
- Follow instructions provided by our team to set up any necessary whitelisting in your customers' systems
- Identify your internal point-of-contact information for any questions or updates
- Receive regular notifications and reports from our team
